

EASTERN PARTNERSHIP Textile and Fashion Delegation to Sweden

Open Trade Gate Sweden

Open Trade Gate Sweden, a part of National Board of Trade, promotes import to Sweden from low- and middle income-countries. We support small and medium sized companies in our partner countries to strengthen their capacity to export to Sweden and the EU. Through training, coaching, and matchmaking, we assist companies in our partner countries to become export-ready, open doors to the Swedish and European markets, and build long-term business relationships. Export contributes to the creation of new jobs and increased tax revenue, which, in turn, may lead to greater prosperity and improved living conditions in the countries.

The Textile & Apparel (T&A) project is part of RECONOMY, an inclusive and green economic development program of the Swedish International Development Cooperation Agency (Sida), implemented by Helvetas in the Eastern Partnership and Western Balkans. Covering Armenia, Georgia, Moldova, and Ukraine, the T&A project aims to facilitate the introduction of circular business models and resource efficiency in the T&A industry to improve competitiveness and ensure growth and access to international markets. Increased access to competencies, business services, and a better regulatory environment will improve the employability of the personnel in the T&A industry and ensure better access to export opportunities. Helvetas leads the facilitation and coordination of the project, working closely with system drivers to enhance sustainability practices, improve skills, and facilitate market linkages.
